Microsoft Security

Defend Against Threats with SIEM Plus XDR Workshop

Learn how to put next-generation Microsoft security tools to work for you.

Workshop highlights

- Review your security goals and objectives
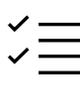

- Identify real threats in your cloud environment with Threat Check

- Map identified threats to specific solution recommendations

- Showcase security scenarios with product demos

- Develop joint plans and next steps

Do you know how many phishing attacks your organization has received? If employees are using the right password protocol? Whether personal data is being exposed? In short, is your organisation's cloud environment as secure as you think it is?

Improve your security posture with a Defend Against Threats with SIEM Plus XDR Workshop

Organisations today are managing a growing volume of data and alerts while dealing with tight budgets and vulnerable legacy systems. Get help achieving your broader security objectives—and identify current and real threats—by scheduling a Defend Against Threats with SIEM Plus XDR Workshop.

We can help you develop a strategic plan customized for your organisation and based on the recommendations of Microsoft experts in security. You'll gain visibility into immediate threats across email, identity, and data, plus clarity and support on how to upgrade your security posture for the long term.

Why you should attend

Given the volume and complexity of identities, data, applications, devices, and infrastructure, it's essential to learn how secure your organisation is right now, and how to mitigate and protect against threats moving forward. By attending this workshop, you can:

Identify current, ongoing security threats in your cloud environment	Walk away with actionable next steps based on your specific needs and objectives	Document your security strategy for the benefit of key stakeholders	Better understand how to accelerate your security journey using the latest tools

What to expect:

During this-workshop, we'll partner with you to strengthen your organization's approach to cybersecurity. We'll help you better understand how to prioritize and mitigate potential attacks, with:

- Deep analysis of cyberattack threats that are found targeting your organization

- Actionable recommendations to help immediately mitigate the identified threats

- A detailed assessment of your IT and security priorities and initiatives, direct from cybersecurity pros

- An inside look at Microsoft's holistic approach to security, and how it relates to your organization

- Demonstrations of integrated security, including the latest tools and methods

- Long-term recommendations from Microsoft experts about your security strategy, with key initiatives and tactical next steps

Pre-Engagement Call	Kick-off Meeting	Cloud Discovery Log Collection	Threat Exploration	Threat Results Presentation	Engagement Decommissioning
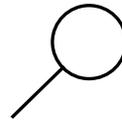

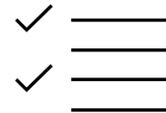

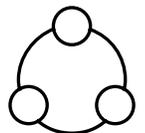

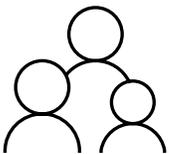

Who should attend

The workshop is intended for security decision-makers such as:

- Chief Information Security Officer (CISO)
- Chief Information Officer (CIO)
- Chief Security Officer (CSO)
- Data Protection Officer

- Data Governance Officer
- IT Security, IT Compliance, and/or IT Operations
- Data Governance

Why CPS ?

When it comes to security, you need an experienced partner. As a Microsoft Gold Partner, CPS works hand in hand with Microsoft to deliver expertise to support your security posture and deliver protection for your Microsoft 365 workloads, protecting your emails, endpoints and users against threat. Using Microsoft 365 Defender we will help enable to core features that will help you understand, prioritise and mitigate potential threats, keeping your organisation safe.

We aim to amplify the benefits of every solution we work with, and not expect that one set of functions will fit all requirements. That is how we extract maximum benefit from Microsoft 365 and ensure a more secure environment for your organisation and employees. Our team of consultants, architects and project managers work with you to envision a secure modern workplace where your employees are empowered to work from anywhere, across devices, in a compliant, trusted and secure manner.
