

Zero Trust Identity & Access Management

Cloud technology is transforming the way you work, and organisations now need to consider what lies beyond the traditional network security perimeter, and adopt a modern security posture.

With a diverse array of devices, users, apps, and data, traditional perimeter-based security models simply can't provide visibility and keep pace with the sophistication of modern threats. A security model which adapts to the reality of the world we live in is now required based on a new set of principles to:

- Move from assumption to explicit verification.
- Adopt a policy-based, least-privileged access model.
- Design with the principle that every element of your system can be breached.

These are the key principles of Zero Trust. Zero Trust provides a modern security framework to manage the complexity of today's organization. A holistic approach to Zero Trust should extend throughout your entire digital estate.

Protect identities and secure apps with Microsoft Azure AD, using Zero Trust principles.

Zero Trust empowers your users to work securely anywhere, anytime, on any device.

This engagement is for new and existing Microsoft 365 users of all sizes to define your approach to Zero Trust principles.

CPS' Microsoft 365 Zero Trust service is designed to establish identity as the security perimeter of your Microsoft 365 environment. CPS' Microsoft Certified team work with your IT and Security teams to:

- Protect identities & manage access
- Protect devices & data
- Secure apps and resources

What can be included

- Azure AD Identity Protection
- Azure AD Conditional Access
- Privileged Identity Management
- Microsoft Defender for Cloud Apps

“ Cyber security has been a major news item during the past year. Microsoft 365 Security, Compliance and Identity is part of how organisations can keep ahead of bad-actors.

Peter Rising, MVP & Head of SCI, CPS ”

Example Engagement

Discovery & Envisioning

- Identify stakeholders
- Requirement workshop(s)
- Roadmap
- Deployment approach

Proof of Concept or Pilot

- Configure
- Review against use-cases
- Refine design
- Documentation

Deploy into Services

- Production deployment
- Adoption support
- Documentation
- Transition to managed support

Compliment this offering with our other services:

Zero Trust Identity and Access Management is one of CPS' services from a catalogue of capabilities that can be used to deliver a holistic cyber security posture to protect your employees, organisation and data. Additional services include:

Security, Compliance & Identity Fundamentals

Compliance & Information Protection

Risk Management

Zero Trust & Identity Management

Threat Protection

Endpoint Management

Next Steps

- Speak to CPS and arrange a meeting specific to your needs
- Sign-up for one of our live webinars
- Watch on-demand webinars
- Read CPS' blogs

Security Operations Centre

Customers that deploy Microsoft Security, Compliance & Infrastructure capabilities can benefit further by purchasing CPS' Security Operation Centre proactive monitoring service. Speak to your CPS representative for further details, and view details at cps.co.uk/managedservices.

Why CPS?

CPS is recognised as a Microsoft Gold Partner and has a dedicated Security, Compliance and Identity practice. Our Microsoft Gold Certifications and Advanced Certifications are proof of our dedication to excellence. We are also a FastTrack Ready Partner and have ISO accreditations 27001:2013, 9001:2015, 20000-1:2018 & 14001:2015.
