

Empowering Healthcare with AI and Microsoft Copilot

Free up time to care with AI that supports clinical, admin, and operational teams.

Healthcare professionals are under constant pressure to deliver more with fewer resources. Microsoft Copilot helps NHS trusts and healthcare providers streamline everyday tasks using AI directly within Microsoft 365 apps. Whether it's drafting patient communications, summarising clinical notes, or improving reporting, Copilot enables safer, faster, more informed decisions, without adding to the workload.

The Opportunity with AI & Microsoft Copilot

Reduce administrative burden by automating meeting summaries, report generation, and documentation.

Enhance patient communications with AI-drafted letters, appointment follow-ups, and responses.

Support clinical teams with fast access to policy documents, guidelines, or summaries via natural language queries.

Ensure compliance and security with Microsoft's trusted governance and data handling controls.

Accelerate audits and reporting with AI-driven analysis and summarisation.

Common Use Cases in Healthcare

Drafting discharge letters or clinic summaries

Summarising MDT (multidisciplinary team) notes or handovers

Managing rotas, referrals, or waiting list data in Excel

Extracting insights from patient feedback or survey results

Building internal chatbots for HR, IT, or staff wellbeing support

Why Choose CPS?

- #1 Copilot partner in the UK, & #4 across Europe
- Copilot Accelerators tailored for healthcare workflows and priorities
- Specialists in adoption, change management, and frontline enablement

- Experience supporting NHS trusts and healthcare systems with Microsoft 365, Teams, and Power Platform
- Deep understanding of healthcare data governance and compliance
